Dear Friends & Colleagues

The Holmium Academy welcomes you to UK for the holmium laser surgery course for urological diseases. Thanks to the continued developments of new surgical Techniques in Holmium laser surgery, as well as introduction of new holmium laser devices and accessories, the program promises to be dynamic. Come prepared for an interesting educational day which will include theoretical training as well as live surgery cases. The Holmium Academy has been strongly collaborating with leading physicians around the world, and thanks to this partnership and successful cooperation, we are delighted to be able to offer you an honorable faculty as course instructors.

My colleagues and I look forward to seeing you there!

Vaughan Daniels-Hepnar
Holmium Clinical Manager
Lumenis

Introduction

Live Surgery, presentations and Tips & Tricks to demonstrate the versatility of the Lumenis Pulse Moses Holmium Laser System specifically in the areas of ureteroscopic management of patients with urinary stones and Benign Prostatic Hyperplasia with the surgical paradigm of Xpeeda Vaporization and Holmium Laser Enucleation of the Prostate - HoLEP.

The course is a comprehensive scientific meeting for clinicians and nursing staff, provided by well-recognized experts. Available as a 2 day meeting or as just 1 day focusing on either stone or BPH management.

The first day of the course will focus on ureteroscopic management of patients with urinary stones and the second, on the treatment of BPH with Xpeeda Vaporization and HoLEP and tissue morcellation procedures.

The course will also include other techniques of the Holmium laser surgery for prostatic, stone and bladder tumour disease and its use as a day surgery technique.

Upon successful completion of this course, you will be able to move to the mentoring proctorship program provided by the Holmium Academy and become one of the growing number of surgeons offering the surgical paradigms of Holmium to their patients with the safety, security and efficacious outcomes that come from offering these new gold standard treatments.

The Faculty

Mr. Andrew Symes
NHS Consultant Urological Surgeon

Associate Professor,
University of Michigan

Mr. Tim Larner
Consultant urologist,
Brighton, UK

Mr. Tev Aho
Cambridge University
Hospitals, UK

Mr. Marc Cynk
Maidstone NHS Trust,
UK

Monday, November 6th, 2017

ureteroscopic management of patients with urinary stones

Registration	10:00
Welcome and Introduction The Versatility of the Holmium Pulse MOSES Laser for: • ureteroscopic management, • BPH • Reducing and flattening the learning curve • Continuing medical education and training in Laser Urology	10:30
The Basics. Laser physics, interaction and safety - The physics of MOSES - Andy Symes	10:35
Laser techniques for: Stones Laser PCNL	11:00
The different techniques of stone dusting with video - Khurshid Ghani	11:30
Live Case - Andy Symes	12:15
Lunch	13:00
Live Case - Andy Symes	14:00
Video presentation: Stone Dusting	15:30
Results and Evidence - Andy Symes and Khurshid Ghani	16:15
Tips & Tricks	16:45
Stones MDT - Chair - Mark Cynk	17:15
Closing: Q&A and remarks	18:00

*NB – Program may alter / change due to factors outside our control

Tuesday, November 7th, 2017

treatment of benign prostatic hyperplasia

Registration	09:30
Welcome - Tim Larner	10:00
The Basics. Laser physics, tissue interaction and safety - Tim Larner	10:05
Laser techniques for Holmium Laser Vaporization of the Prostate - Tim Larner	10:30
Live Case: Holmium Laser Vaporization of the prostate - Tim Larner	11:00
The tools and equipment required	12:00
Results and the Evidence - Tim Larner	12:30
Lunch	13:00
Laser techniques for Holmium Laser Enucleation of the prostate - Mark Cynk	14:00
Live video case: Holmium Laser Enucleation of the prostate - Mark Cynk	14:30
The tools and equipment required	15:00
Results and Evidence - Tev Aho	15:30
How do the treatment options of Holmium Laser in BPH fit together in practice - Tim Larner	16:00
The Holmium Academy and our commitment to training and education through mentorship - Chair: Andy Symes	16:45
BPH MDT - Chair: Andy Symes	17:30
Closing: Q&A and remarks	18:00

Registration
