

Women's Health Acupulse and Ultrapulse CO2 laser course

Laparoscopic Endometriosis, Vaginal Regeneration
and Colposcopy Procedures

Milan, San Raffaele Hospital
Mon 21 - Tue 22 October 2019

Women's Health AcuPulse Duo CO2 Laser Course

Laparoscopic Endometriosis, Vaginal Regeneration
and Colposcopy Procedures

The application of laser therapy as an adjunct in gynaecological diseases has increased considerably. Many specialists now consider introducing laser technology into their gynaecology and outpatient procedures. We are convinced of its benefits and so, have commenced our laser workshops on gynaecological surgery. The basic intention is to provide a practical introduction and approach to technical issues.

The present workshop is intended to orientate gynaecology colleagues who want to start with CO2 laser surgery, particularly for endometriosis, colposcopy and vaginal regeneration by offering live surgery and hands-on exercises in the lab.

Participants will be provided with an AcuPulse Duo CO2 laser system and instruments in order to perform supervised training on a pelvic trainer.

Live surgery will be focused on the benefits of the CO2 laser during laparoscopic procedures for benign pathologies: eg: endometriosis, ovarian cyst and adhesions; colposcopic procedures and vaginal regeneration procedures for vaginal atrophy and stress urinary incontinence.

Course directors:

Prof. M. Candiani (laparoscopic endometriosis)

Dr Carlo Gastaldi (Vaginal Atrophy, SUI)

Prof. Origoni (Coplposcopy)

Monday 21st October 2019
Endometriosis cases and hands-on.
