Introduction

This is a practical course in the use of the Holmium Laser for Prostate and Stone a Disease and its use as a day surgery technique.

Your whole team is welcome.

The course is ideal for novices and those wishing to develop their experience further and will form an invaluable part of the Holmium Academy Training and Mentoring Program.

We encourage the principles of modular training, initiated by the Holmium User Group in the UK with live demonstrations of Holmium Laser Enucleation (HoLEP) and morcellation.

The Faculty

Peter Schatteman

Uroloog bij OLV
Ziekenhuis Aalst-Asse-
Ninove, Belgium

Saturday 10th December, 2016

- 09.30 Registration
- 10.00 Welcome
- 09.00 The basics. Laser physics, tissue interaction and safety
- 10.30 Laser techniques for: BPH
 - Stones Dusting
 - Laser PCNL
- 11.15 Modules for learning HoLEP
- 11.30 Video case: 60 - 100g HoLEP
- 13.00 Lunch
- 13.30 Day surgery HoLEP: Results - Pathways for success and the evidence
- 14.00 Video case: Stone Dusting
- 15.00 Video presentation: Stone Dusting and PCNL
- 15.30 Live Laser Surgical Simulation
 - Stone Dusting
 - HoLEP

Close
